

HAFSA AQEEL

With **3+ years** of experience in **Software Quality Assurance**, I specialize in building robust test automation frameworks and ensuring the reliability of diverse web applications. Skilled in both manual and automated testing, I have a strong command over **UI** and **API testing** methodologies. Recently transitioning into the **FinTech** space, I am expanding my expertise in AML solutions by focusing on **End-to-End (E2E) automation**, **API validations**, and **CI/CD integrations** to ensure rapid feedback and confident releases.

WORK EXPERIENCE

- **Working Student - QA Engineer**
Hawk AI GmbH [September 2025 – Present]
Munich, Germany | Hybrid
 - Developed UI and End-to-End tests for core AML workflows (SSO, dynamic filters) using **Playwright**.
 - Tested REST APIs and mocked external services using **Java**, **AssertJ**, and **MockServer**.
 - Automated CRON-scheduled test executions across multiple environments using **GitHub Actions**.
 - Analyzed test results, UI logs, and API calls using **Allure Reports** for rapid debugging.
 - Enforced TDD practices and static code analysis using **SonarQube** and **Checkstyle**.
- **Consultant Quality Assurance**
Systems Limited [December 2021 – April 2024]
Country: Pakistan - Hybrid | Full-Time
 - Automated and manually tested application modules to ensure stability, functionality, and quality across releases.
 - Initiated **Cypress automation framework** for UI and API test coverage; also performed API testing using **Postman** to validate backend services.
 - Conducted **database testing** using **SQL queries** to verify data accuracy and consistency.
 - Designed and executed test cases for internal web applications, covering both new features and regular maintenance.
 - Performed **smoke** and **regression testing** in UAT and production environments to ensure end-to-end system reliability.
 - Collaborated with developers and used **JIRA**, **Jenkins**, and **GitHub** for issue tracking, CI, and process optimization.

EDUCATION

- **Masters in Information and Communication Technology**
Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
[April 2024 – Present]
Courses: Human Computer Interaction, Machine Learning for Engineers I & II, Intro to Deep Learning, Pattern Recognition, Pattern Analysis, Swarm Intelligence
- **Bachelors in Telecommunications Engineering**
NED University of Engineering and Technology, Karachi
[October 2017 – August 2021]
Courses: Programming Languages, Introduction to Computing, Data Structure & Algorithms, Digital Logic Design, Probability & Statistics, Differential & Integral Calculus, Entrepreneurship, Microprocessor Programming & Interfacing

DIGITAL TOOLS & SKILLS

Playwright | Java | JavaScript | API Testing | REST APIs | Postman | AssertJ | MockServer | Webhook.site | JMeter | Grafana | GitHub Actions | Jenkins | Git | GitHub | Docker | Gradle | Allure Reports | SonarQube | Checkstyle | PMD | Test-Driven Development (TDD) | Agile (Scrum) | SDLC & STLC | End-to-End (E2E) Testing | Regression Testing | Smoke Testing | User Acceptance Testing (UAT) | Jira | Confluence | SharePoint | SmartSheet | Developer Portal Documentation | SQL | MySQL | Anti-Money Laundering (AML) | Risk & Compliance Testing | Financial Data Analysis | Explainable AI

TECHNICAL SKILLS

- **Project & Release Management**
Effectively prioritize tasks to meet tight release deadlines in fast-paced Agile environments. Take ownership of testing cycles from planning to UAT and Production rollouts.
- **Requirement Analysis & Strategy**
Strong ability to analyze complex business requirements (via Confluence/Dev Portals) and translate them into comprehensive test strategies with maximum coverage.
- **Process Optimization & SDLC**
Advocate for continuous quality improvements and TDD practices. Focus on early defect detection to reduce integration issues and ensure smooth deployments.
- **FinTech Domain Adaptability**
Quick to grasp complex financial workflows (AML, Risk, Compliance) and align testing efforts with strict regulatory and security standards
- **Hybrid Team Collaboration**
Skilled in managing cross-functional communication and remote workflows using Jira, ensuring seamless alignment between developers, analysts, and stakeholders.

PROJECTS

- [April 2025]
Automation Testing with Cypress (JavaScript)
https://github.com/hafsaaqeel/Automation_UI_and_API
 - Implemented a full-stack test automation framework using **Cypress** for both **UI** and **API** testing.
 - Integrated **GitHub Actions** for continuous integration, triggering test runs automatically on every code push.
- [Aug 2020 – Aug 2021]
Bachelor's Final Year Project - Health Monitoring System via MMWAVE Radar
 - Titled as the **"Best Final Year Project 2021"** at NEDUET under UAFA.
 - Leveraged a **Python** and **Java** software development kit from GitHub to integrate **Artificial intelligence** and **Internet of Things (IoT)** technologies.
 - Using mm-wave Radar, we worked on vital sign identification in health monitoring for the purpose of predicting and forecasting human health.

CERTIFICATIONS

- [September 2023]
Business Intelligence Foundation Professional Certification
BIAPC™
- [August 2023]
Agile Manual and Automation Testing Certification
- [July 2023]
Scrum Foundation Professional Certificate - SFPC™
